

**Introducing  
programming  
to KS 3 and 4**

**On-site ICT expertise**

### **The opportunity**

There is no doubt that teaching aspects of computer science, such as programming, can add breadth, rigour and excitement to the ICT curriculum for all. It can also provide inspiration to those who might go on to choose it as an area for specialist study.

### **What might be getting in the way**

- A bewildering choice of languages and software
- A lack of staff technical knowledge and confidence in this area
- Insufficient time for staff to adequately research and explore the possibilities

### **The Education Vision solution**

Flexible support that can be tailored to meet the needs of individual departments, based around the packages below.

**Programming  
packages**

**Programming Possibilities:** Delivered as a single half-day or two twilight sessions, this will set out some of the key software that is available (mostly free-to-use) and explore what it can deliver. An overview of GCSE Computer Science qualifications can be included on request.

**Additional Support:** Additional visits to allow further training in the chosen tool(s) or for curriculum planning.

**Programming Possibilities** (single visit, up to 3 hrs)

**Programming Possibilities\*** (two twilight visits)

**Additional Support\*** (twilight, single visit/three visits\*\*)

**Additional Support\*** (half day, single visit/three visits\*\*)

**Contact us for  
current pricing**

\*Twilight = up to 2 hours on-site after 3pm, Half Day = up to 2.5 hours on site.

\*\*Visits must take place within 12 months of the start of support and cannot be carried forward into subsequent years. There is no VAT to add.

Education Vision Consultancy Ltd (EVC) is an independent education consultancy operated by Mark Baker, formerly ICT Adviser for Bracknell Forest Council and Regional Delivery Adviser for Becta. Mark has many years experience running CPD, training and consultancy sessions for schools and local authorities. He has particular interests in e-safety, learning platforms, programming, photography and audio podcasting. See the [Education Vision website](http://www.educationvision.co.uk) for more details and a free resources area.

**Flexible on-site ICT support**
